Data Analyst

Aspiring Data Scientist with practical experience in data analysis, machine learning, and NLP techniques. Proficient in Python (Pandas, NumPy, Scikit-learn) and SQL, with experience in building end-to-end models and deriving business insights. Strong analytical mindset with focus on automation and scalable solutions.

Education

B.Tech in Computer Science and Engineering

Din Dayal Engineering College

07/2020 - 06/2024

8.0

Courses

- Software Engineering
- Data Structures
- Artificial intelligence
- Computer network

Intermediate

Vidyapeeth

04/2019 - 03/2020

Lucknow

Courses

- Physics
- Chemistry
- Mathematics

Personal Projects

Sales Data Analysis Dashboard (SQL + Python)

07/2023 - 02/2024

- Extracted and cleaned large datasets using SQL and Python
- Performed exploratory data analysis to identify trends
- Created dashboards/visualizations to support business decisions

Work Experience

Data Science Intern

Ascedance

07/2024 - Present

Noida

Achievements/Tasks

- Performed data cleaning and preprocessing using Python (Pandas, NumPy)
- Worked on machine learning models for predictive analysis
- Conducted data analysis to extract actionable insights
- Collaborated with team members on data-driven solutions
- Documented findings and presented insights using Excel and reports

Skills

-Python

-SQL

-Pandas

-Numpy

-Scikit-learn

-Matplotlib

-Seaborn

-NLTK

-Regression

-Logistic Regression

-Text PreProcessing

-Data Cleaning

-spaCY

-Random Forest

-Tokenization

-Classification

-Problem-Solving

-Analytical Thinking

-Sentiment Analysis

-Data Manipulation

-Time Management

-Teamwork

Certificates

NLP Certification

Python for Data Science – Udemy

Machine Learning with Python – Coursera
